Background

Background and Methodology

Inner West Council sought to examine community attitudes and perceptions towards current and future services and facilities provided by Council. Key objectives of the research included:

- Assessing and establishing the community's priorities and satisfaction in relation to council activities, services, and facilities
- Identifying the community's overall level of satisfaction with Council's performance
- Identifying the community's level of agreement with prompted statements surrounding wellbeing/connectedness
- Identifying methods of communication and engagement with Council

To facilitate this, Micromex Research was contracted to develop a survey template that enabled Council to effectively analyse attitudes and trends within the community.

Questionnaire

Micromex Research, together with Inner West Council, developed the questionnaire.

A copy of the questionnaire is provided in the Appendix.

Data collection

The survey was conducted during the period 13th – 26th October 2016 from 4:30pm to 8:30pm Monday to Friday, and from 10am to 4pm Saturday.

Survey area

Inner West Council Government Area.

Sample selection and error

1,008 resident interviews were completed. 897 of the 1,008 respondents were selected by means of a computer based random selection process using the electronic White Pages. The remaining 111 respondents were 'number harvested' via face-to-face intercept at a number of areas around Inner West LGA, including Orange Grove Markets/Woolworths, Loyalty Square, Balmain, Addison Road Markets, Marrickville Train Station, Ashfield Train Station and Liverpool Rd (near Ashfield Mall/Library).

A sample size of 1,008 residents provides a maximum sampling error of plus or minus 3.1% at 95% confidence. This means that if the survey was replicated with a new universe of N=1,008 residents, 19 times out of 20 we would expect to see the same results, i.e. +/- 3.1%.

This means, for example, that an answer such as 'yes' (50%) to a question could vary from 47% to 53%.

The sample was weighted by age and gender to reflect the 2011 ABS census data for the areas that formed the new Inner West Council LGA.

Interviewing

Interviewing was conducted in accordance with the AMSRS (Australian Market and Social Research Society) Code of Professional Behaviour.

Background and Methodology

Prequalification

Participants in this survey were pre-qualified as being over the age of 18, and not working for, nor having an immediate family member working for, Inner West Council.

Data analysis

The data within this report was analysed using Q Professional. To identify the statistically significant differences between the groups of means, 'One-Way Anova tests' and 'Independent Samples T-tests' were used. 'Z Tests' were also used to determine statistically significant differences between column percentages.

Ratings questions

The Unipolar Scale of 1 to 5, where 1 was the lowest importance or satisfaction and 5 the highest importance or satisfaction, was used in all rating questions.

This scale allowed us to identify different levels of importance and satisfaction across respondents.

Note: Only respondents who rated services/facilities a 4 or 5 in importance were asked to rate their satisfaction with that service/facility.

Percentages

All percentages are calculated to the nearest whole number and therefore the total may not exactly equal 100%.

Micromex Benchmarks

These benchmarks are based on 60 LGAs that we have conducted community research for, and were revised in 2016 to ensure the most recent comparable data. Since 2008 Micromex has worked for over 70 NSW councils and conducted 100+ community satisfaction surveys across NSW.

NSW LGA Brand Scores Benchmark

These benchmarks are based on a branding research study conducted by Micromex in 2012, in which residents from all 152 LGAs were interviewed in order to establish a normative score.

Errors: Data in this publication is subject to sampling variability because it is based on information relating to a sample of residents rather than the total number (sampling error).

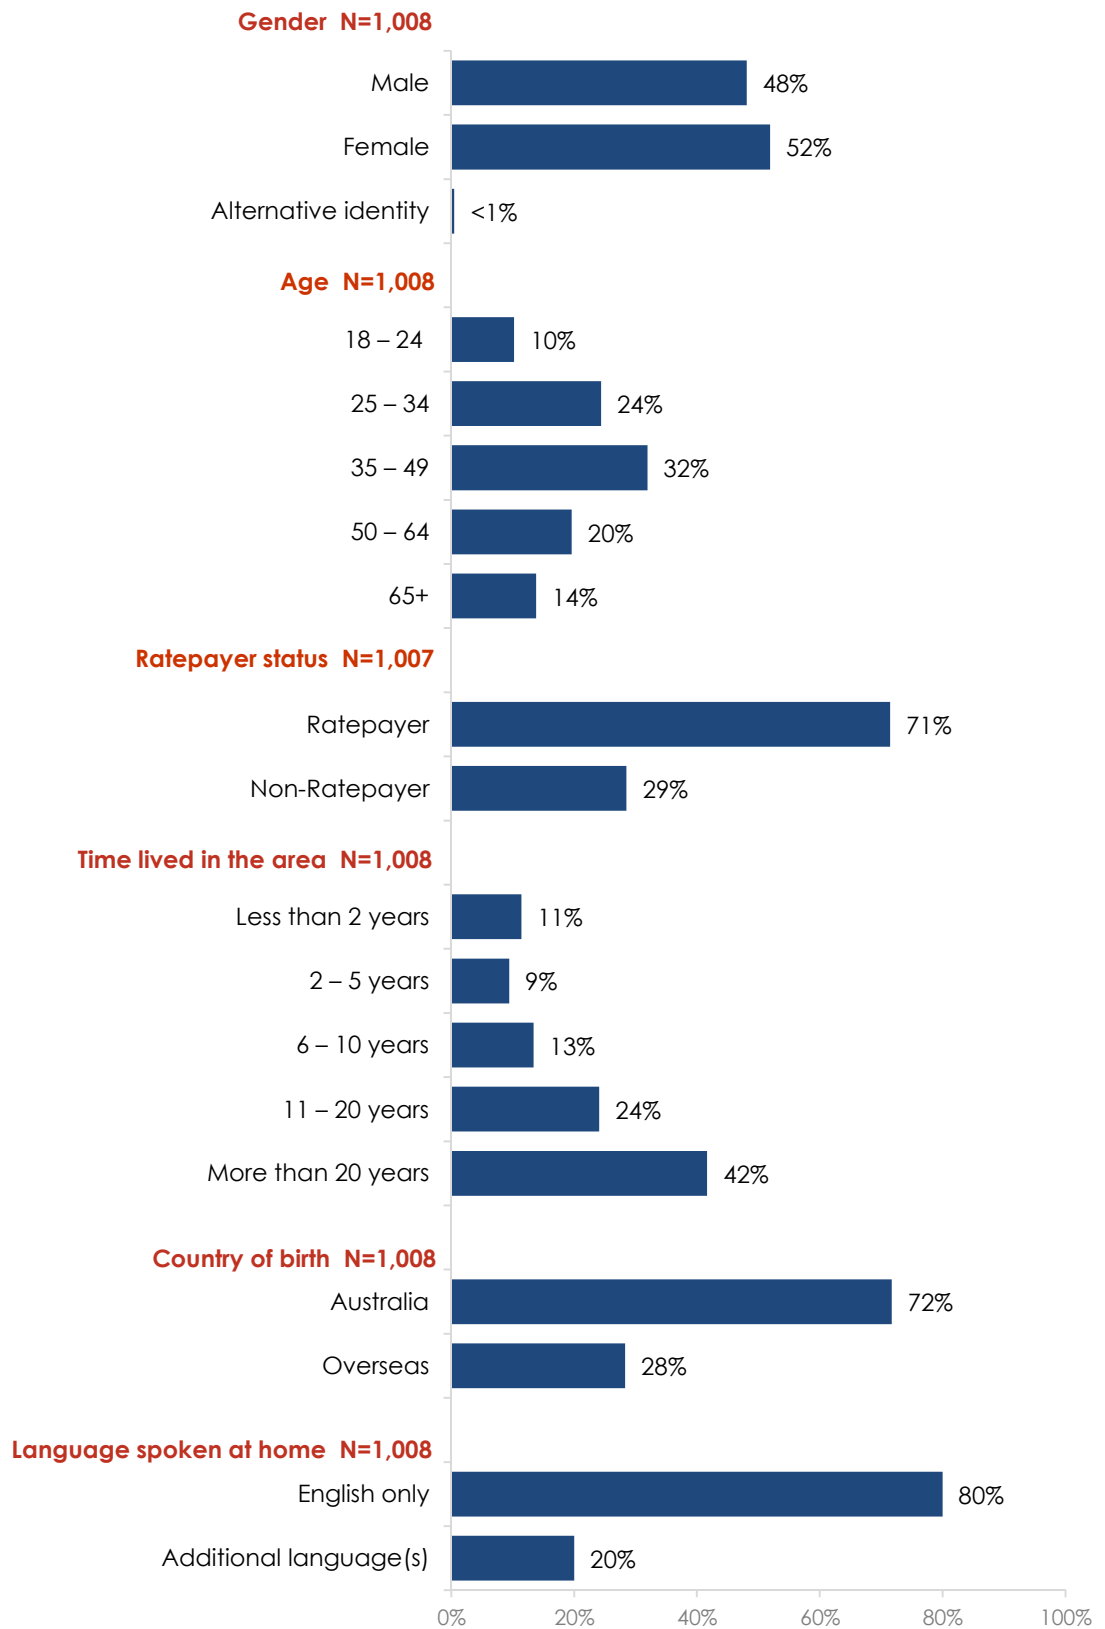

In addition, non-sampling error may occur due to imperfections in reporting and errors made in processing the data. This may occur in any enumeration, whether it is a full count or sample.

Efforts have been made to reduce both sampling and non-sampling error by careful design of the sample and questionnaire, and detailed checking of completed questionnaires.

As the raw data has been weighted to reflect the real community profile of Inner West Council, the outcomes reported here reflect an 'effective sample size'; that is, the weighted data provides outcomes with the same level of confidence as unweighted data of a different sample size. In some cases this effective sample size may be smaller than the true number of surveys conducted.

Sample Profile

Sample Profile

A sample size of 1,008 residents provides a maximum sampling error of plus or minus 3.1% at 95% confidence. The sample has been weighted by age and gender to reflect the 2011 ABS community profiles for the areas that formed the new Inner West Council.

Sample Profile

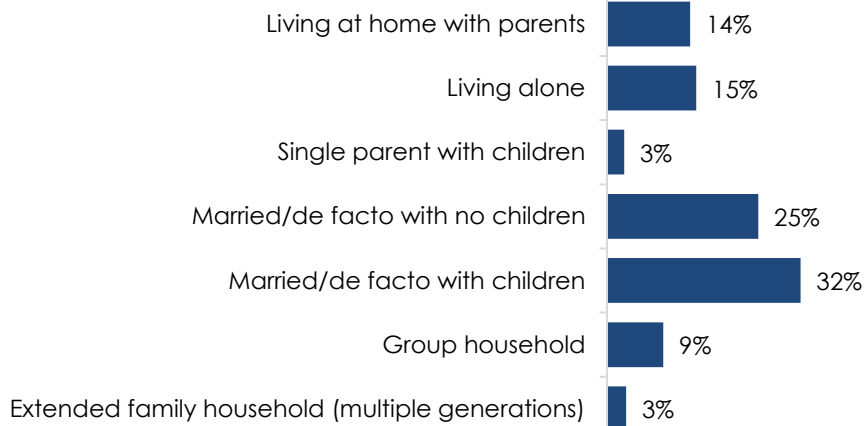

Ward N=1,008

Main household earner N=1,008

Lifestage status N=1,005

Identifying as having a disability N=1,007

0% 20% 40% 60% 80% 100%

A sample size of 1,008 residents provides a maximum sampling error of plus or minus 3.1% at 95% confidence. The sample has been weighted by age and gender to reflect the 2011 ABS community profiles for the areas that formed the new Inner West Council.

Key Findings

Key Findings

Overview (Overall satisfaction)

Summary

Overall satisfaction was moderate, with 85% stating they were at least 'somewhat satisfied' with Council's overall performance. The rating achieved is similar to the NSW branding benchmark for metropolitan councils.

Q4a. Overall, how satisfied are you with the performance of Inner West Council, not just on one or two issues but across all responsibility areas?

	Overall	Male	Female	18 – 24	25 – 34	35 – 49	50 – 64	65+
Mean ratings	3.42	3.32	3.50▲	3.51	3.60	3.32	3.32	3.37

	Ashfield Ward	Leichhardt Ward	Balmain Ward	Stanmore Ward	Marrickville Ward	Ratepayer	Non-Ratepayer
Mean ratings	3.51	3.33	3.32	3.39	3.53	3.36	3.58▲

NSW LGA BRAND SCORES	Metro Benchmark	All of NSW	Inner West Council
Mean ratings	3.45	3.31	3.42

Scale: 1 = not at all satisfied, 5 = very satisfied

▲ ▼ = A significantly higher/lower level of satisfaction (by group)

Base: N=1,008

Key Findings

Overview (Availability and Accessibility of Council Services)

Summary

71% of residents rated the availability and accessibility of council services highly, claiming the services were 'good' to 'excellent'.

Q4b. How would you describe the availability and accessibility of Council services?

	Overall	Male	Female	18 – 24	25 – 34	35 – 49	50 – 64	65+
Mean ratings	3.96	3.89	4.02	4.03	3.94	3.85	4.04	4.05

	Ashfield Ward	Leichhardt Ward	Balmain Ward	Stanmore Ward	Marrickville Ward	Ratepayer	Non-Ratepayer

Scale: 1 = very poor, 6 = excellent
 ▲▼ = significantly higher/lower rating

Base: N=985

Note: 23 residents (2%) responded 'don't know' to this question.

Key Findings

Overview (Council's Community Engagement)

Summary

58% of residents rated Council's community engagement as good to excellent.

Q4c. How would you describe Council's community engagement?

	Overall	Male	Female	18 – 24	25 – 34	35 – 49	50 – 64	65+
Mean ratings	3.52	3.46	3.59	3.51	3.60	3.43	3.50	3.63

	Ashfield Ward	Leichhardt Ward	Balmain Ward	Stanmore Ward	Marrickville Ward	Ratepayer	Non-Ratepayer
Mean ratings	3.49	3.55	3.45	3.35	3.75▲	3.53	3.53

Scale: 1 = very poor, 6 = excellent
 ▲▼ = significantly higher/lower rating

Note: 8 residents (1%) responded 'don't know' to this question.

Key Findings

Overview (Council's Integrity and Decision Making)

Summary

70% of residents are 'somewhat satisfied' to 'satisfied' with Council's integrity and decision making. There is room for the new council to improve this score.

Q5. How satisfied are you with Council's integrity and decision making?

	Overall	Male	Female	18 – 24	25 – 34	35 – 49	50 – 64	65+
Mean ratings	2.96	2.93	2.99	3.04	3.17	2.81 ▼	2.82 ▼	3.07

	Ashfield Ward	Leichhardt Ward	Balmain Ward	Stanmore Ward	Marrickville Ward	Ratepayer	Non-Ratepayer
Mean ratings	2.98	3.16	2.85	2.78	3.04	2.89	3.14

Scale: 1 = not at all satisfied, 5 = very satisfied

▲ ▼ = significantly higher/lower rating

Note: 1 resident (<1%) could not answer this question.

Key Findings

Overview (Top Priority Areas for Council to Focus on)

Summary

Residents are most concerned about the amount of development occurring in the area, and the flow-on effects of traffic congestion, population growth, public transport, parking, green spaces, environmental concerns and infrastructure.

Q7. Thinking of Inner West as a whole, what would you say are the top 3 challenges facing the area in the next 10 years?

Word Frequency Tagging

Verbatim responses for this question were collated and entered into analytical software. This analysis 'counts' the number of times a particular word or phrase appears and, based on the frequency of that word or phrase, a font size is generated. The larger the font, the more frequently the word or sentiment is mentioned.

Key Findings

Top Service Areas (Importance)

The top 10 service areas for importance, as rated by residents were:

	Mean ratings
Access to public transport	4.68
Household garbage collection	4.66
Protecting the natural environment	4.55
Encouraging recycling	4.53
Long term planning for council area	4.51
Safe public spaces	4.51
Managing development in the area	4.48
Community's ability to influence Council's decision making	4.43
Traffic management and road safety	4.43
Provision of council information to the community	4.39

Top and Bottom Service Areas (Satisfaction)

The top 10 service areas for satisfaction, as rated by residents were:

	Mean ratings
Household garbage collection	4.18
Library services	3.93
Maintenance of local parks, playgrounds and sporting fields	3.88
Swimming pools and aquatic centres	3.84
Encouraging recycling	3.84
Access to public transport	3.79
Festival and events programs	3.75
Availability of sporting ovals, grounds and facilities	3.72
Maintenance and cleaning of town centres	3.71
Safe public spaces	3.63

The bottom 10 service areas for satisfaction, as rated by residents were:

	Mean ratings
Community's ability to influence Council's decision making	2.54
Managing development in the area	2.65
Management of parking	2.69
Long term planning for council area	2.83
Cycleways	2.84
Building heights in town centres	2.89
Protection of low rise residential areas	2.95
Tree management	2.95
Protection of heritage buildings and items	3.03
Provision of council information to the community	3.07

Key Findings

Identifying Priorities via Specialised Analysis (Explanation)

The specified research outcomes required us to measure both community importance and community satisfaction with a range of specific service delivery areas. In order to identify core priorities, we undertook a 2 step analysis process on the stated importance and rated satisfaction data, after which we conducted a third level of analysis. This level of analysis was a Shapley Regression on the data in order to identify which facilities and services are the actual drivers of overall satisfaction with Council.

By examining both approaches to analysis we have been able to:

1. Identify and understand the hierarchy of community priorities
2. Inform the deployment of Council resources in line with community aspirations

Step 1. Performance Gap Analysis (PGA)

PGA establishes the gap between importance and satisfaction. This is calculated by subtracting the mean satisfaction score from the mean importance score. In order to measure performance gaps, respondents are asked to rate the importance of, and their satisfaction with, each of a range of different services or facilities on a scale of 1 to 5, where 1 = low importance or satisfaction and 5 = high importance or satisfaction. These scores are aggregated at a total community level.

The higher the differential between importance and satisfaction, the greater the difference is between the provision of that service by Inner West Council and the expectation of the community for that service/facility.

In the table on the following page, we can see the 41 services and facilities that residents rated by importance and then by satisfaction.

When analysing the performance gaps, it is important to recognise that, for the most part, a gap of up to 1.0 is acceptable when the initial importance rating is 4.0+, as it indicates that residents consider the attribute to be of 'high' to 'very high' importance and that the satisfaction they have with Inner West Council's performance on that same measure is 'moderate' to 'moderately high'.

For example, 'access to public transport' was given an importance score of 4.68, which indicates that it is considered an area of 'extremely high' importance by residents. At the same time it was given a satisfaction score of 3.79, which indicates that residents have a 'moderately high' level of satisfaction with Inner West Council's performance and focus on that measure.

In the case of a performance gap such as for 'festival and events programs' (3.57 importance vs. 3.75 satisfaction), we can identify that the facility/service is of 'moderate' importance to the broader community, but for residents who feel that this facility is important, it is providing a 'moderately high' level of satisfaction.

Key Findings

When analysing performance gap data, it is important to consider both stated satisfaction and the absolute size of the performance gap.

Performance Gap Ranking

Ranking	Service/ Facility	Importance Mean	Satisfaction Mean	Performance Gap
1	Community's ability to influence Council's decision making	4.43	2.54	1.89
2	Managing development in the area	4.48	2.65	1.83
3	Long term planning for council area	4.51	2.83	1.68
4	Management of parking	4.03	2.69	1.34
5	Provision of council information to the community	4.39	3.07	1.32
6	Protection of heritage buildings and items	4.24	3.03	1.21
	Tree management	4.16	2.95	1.21
8	Traffic management and road safety	4.43	3.23	1.20
9	Protection of low rise residential areas	4.14	2.95	1.19
10	Protecting the natural environment	4.55	3.38	1.17
11	Maintaining local roads excluding major routes	4.31	3.16	1.15
12	Maintaining footpaths	4.22	3.08	1.14
13	Building heights in town centres	3.92	2.89	1.03
14	Removal of illegally dumped rubbish	4.36	3.37	0.99
15	Support for people with a disability	4.20	3.24	0.96
16	Access to public transport	4.68	3.79	0.89
17	Safe public spaces	4.51	3.63	0.88
	Supporting local jobs and businesses	4.25	3.37	0.88
19	Appearance of your local area	4.31	3.49	0.82
20	Environmental education programs and initiatives	4.06	3.27	0.79
21	Cycleways	3.54	2.84	0.70
22	Encouraging recycling	4.53	3.84	0.69
23	Provision of services for older residents	3.98	3.30	0.68
24	Programs and support for newly arrived and migrant communities	3.75	3.09	0.66
25	Supporting local artists and creative industries	3.78	3.21	0.57
26	Maintenance and cleaning of town centres	4.26	3.71	0.55
27	Maintenance of local parks, playgrounds and sporting fields	4.38	3.88	0.50
28	Household garbage collection	4.66	4.18	0.48
29	Youth programs and activities	3.64	3.25	0.39
30	Community centres and facilities	3.89	3.52	0.37
31	Stormwater management and flood mitigation	3.95	3.59	0.36
32	Promoting pride in the community	3.69	3.39	0.30
	Support and programs for volunteers and community groups	3.74	3.44	0.30
34	Community education programs	3.68	3.43	0.25
35	Availability of sporting ovals, grounds and facilities	3.96	3.72	0.24
36	Graffiti removal	3.37	3.29	0.08
37	Council's childcare service and programs	3.39	3.38	0.01
38	Library services	3.93	3.93	0.00
	Swimming pools and aquatic centres	3.84	3.84	0.00
40	Flood management	3.42	3.45	-0.03
41	Festival and events programs	3.57	3.75	-0.18

Scale: 1 = not at all important/not at all satisfied, 5 = very important/very satisfied

Key Findings

When we examine the review the largest performance gaps, we can identify that all of the services or facilities have been rated as 'high' to 'extremely high' in importance. Resident satisfaction for all of these areas is between 2.54 and 3.38, which indicates that resident satisfaction for these measures is 'moderately low' to 'moderate'.

Ranking	Service/ Facility	Importance Mean	Satisfaction Mean	Performance Gap
1	Community's ability to influence Council's decision making	4.43	2.54	1.89
2	Managing development in the area	4.48	2.65	1.83
3	Long term planning for council area	4.51	2.83	1.68
4	Management of parking	4.03	2.69	1.34
5	Provision of council information to the community	4.39	3.07	1.32
6	Protection of heritage buildings and items	4.24	3.03	1.21
	Tree management	4.16	2.95	1.21
8	Traffic management and road safety	4.43	3.23	1.20
9	Protection of low rise residential areas	4.14	2.95	1.19
10	Protecting the natural environment	4.55	3.38	1.17
11	Maintaining local roads excluding major routes	4.31	3.16	1.15
12	Maintaining footpaths	4.22	3.08	1.14

The key outcomes of this analysis would suggest that, while there are opportunities to improve satisfaction across a range of services/facilities, the 'community's ability to influence Council's decision making' is the area of least relative satisfaction.

Note: Performance gap is the first step in the process, we now need to identify comparative ratings across all services and facilities to get an understanding of relative importance and satisfaction at an LGA level. This is when we undertake step 2 of the analysis.

Key Findings

Quadrant Analysis

Step 2. Quadrant Analysis

Quadrant analysis is often helpful in planning future directions based on stated outcomes. It combines the stated importance of the community and assesses satisfaction with delivery in relation to these needs.

This analysis is completed by plotting the variables on x and y axes, defined by stated importance and rated satisfaction. We aggregate the mean scores for stated importance and rated satisfaction to identify where the facility or service should be plotted. For these criteria, the average stated importance score was 4.08 and the average rated satisfaction score was 3.33. Therefore, any facility or service that received a mean stated importance score of ≥ 4.08 would be plotted in the higher importance section and, conversely, any that scored < 4.08 would be plotted into the lower importance section. The same exercise is undertaken with the satisfaction ratings above, equal to or below 3.33. Each service or facility is then plotted in terms of satisfaction and importance, resulting in its placement in one of four quadrants.

Key Findings

Explaining the 4 quadrants

Attributes in the top right quadrant, **MAINTAIN**, such as 'access to public transport', are Council's core strengths, and should be treated as such. Maintain, or even attempt to improve your position in these areas, as they are influential and address clear community needs.

Attributes in the top left quadrant, **IMPROVE**, such as 'long term planning for the council area' are key concerns in the eyes of your residents. In the vast majority of cases you should aim to improve your performance in these areas to better meet the community's expectations.

Attributes in the bottom left quadrant, **NICHE**, such as 'graffiti removal', are of a relatively lower priority (and the word 'relatively' should be stressed – they are still important). These areas tend to be important to a particular segment of the community.

Finally, attributes in the bottom right quadrant, **COMMUNITY**, such as 'Council's childcare service and programs', are core strengths, but in relative terms they are deemed less overtly important than other directly obvious areas. However, the occupants of this quadrant tend to be the sort of services and facilities that deliver to community liveability, i.e. make it a good place to live.

Recommendations based only on stated importance and satisfaction have major limitations, as the actual questionnaire process essentially 'silos' facilities and services as if they are independent variables, when they are in fact all part of the broader community perception of council performance.

Residents' priorities identified in stated importance/satisfaction analysis often tend to be in areas that are problematic. No matter how much focus a council dedicates to 'maintaining local roads', it will often be found in the **IMPROVE** quadrant. This is because, perceptually, the condition of local roads can always be better.

Furthermore, the outputs of stated importance and satisfaction analysis address the current dynamics of the community, they do not predict which focus areas are the most likely agents to change the community's perception of Council's overall performance.

Therefore, in order to identify how Inner West Council can actively drive overall community satisfaction, we conducted further analysis.

The Shapley Value Regression

This model was developed by conducting specialised analysis from over 30,000 LGA interviews conducted since 2005. In essence, it proved that increasing resident satisfaction by actioning the priorities they stated as being important does not necessarily positively impact on overall satisfaction with the council. This regression analysis is a statistical tool for investigating relationships between dependent variables and explanatory variables.

In 2014, we revised the Shapley Regression Analysis to identify the directional contribution of key services and facilities with regard to optimisers/barriers with council's overall performance.

What Does This Mean?

The learning is that if we only rely on the stated community priorities, we will not be allocating the appropriate resources to the actual service attributes that will improve overall community satisfaction. Using regression analysis we can identify the attributes that essentially build overall satisfaction. We call the outcomes 'derived importance'.

Key Findings

Key Drivers of Satisfaction with Inner West Council

The results in the chart below provide Inner West Council with a complete picture of the intrinsic community priorities and motivations, and identify what attributes are the key drivers of community satisfaction.

These top 12 services/facilities account for almost 50% of overall satisfaction with Council. This indicates that the remaining 29 attributes we obtained measures on have only a limited impact on the community's satisfaction with Inner West Council's performance. Therefore, whilst all 41 service/facility areas are important, only a number of them are significant drivers of the community's overall satisfaction with Council.

These Top 12 Indicators Contribute to Almost 50% of Overall Satisfaction with Council

The contributors to satisfaction are not to be misinterpreted as an indication of current dissatisfaction

These 12 services/facilities are the key community priorities and by addressing these, Inner West Council will improve overall community satisfaction. The score assigned to each area indicates the percentage of influence each attribute contributes to overall satisfaction with Council.

In the above chart, 'protecting the natural environment' contributes 3.2% towards overall satisfaction, while 'community's ability to influence Council's decision making' (7.2%) is a stronger driver, contributing more than twice as much to overall satisfaction with Council.

Key Findings

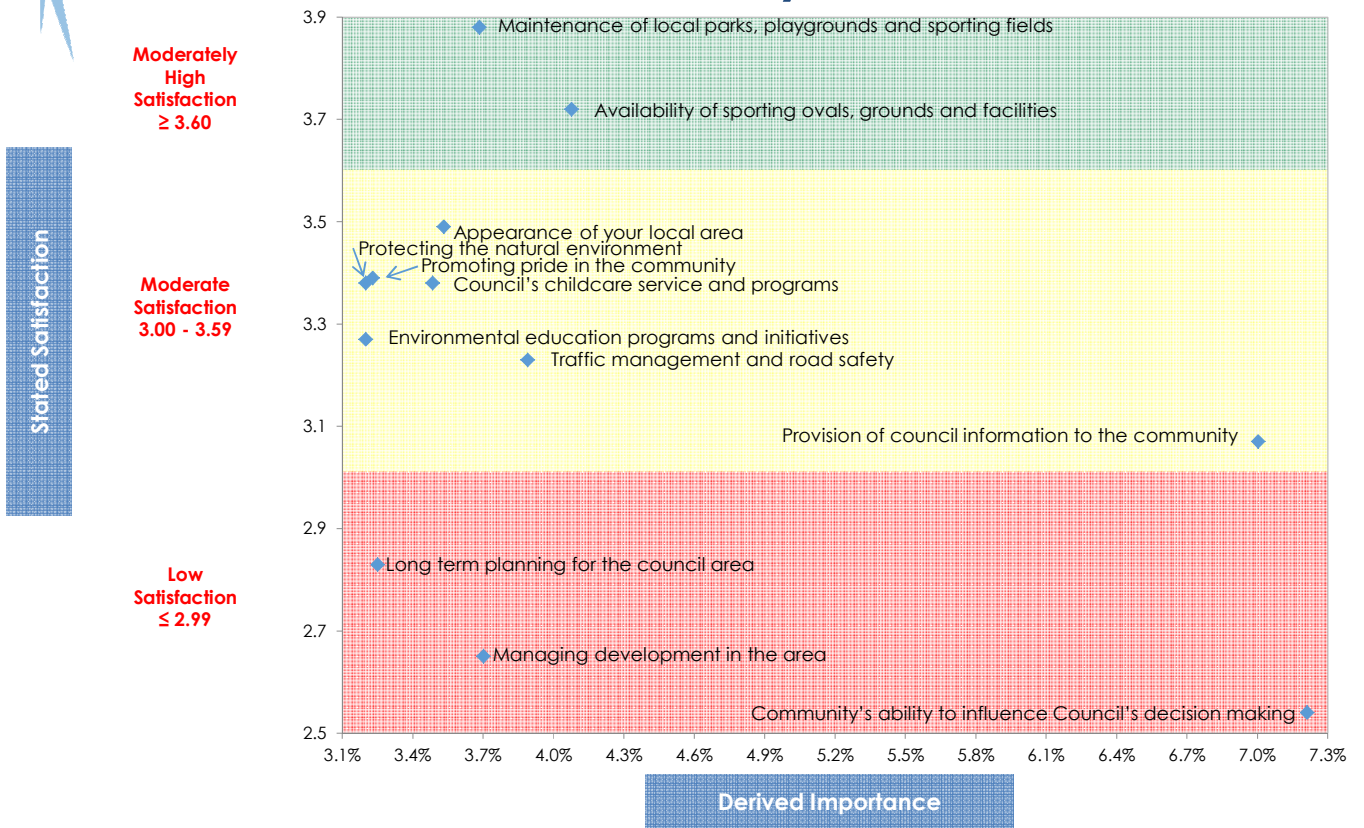

Clarifying Priorities

By mapping satisfaction against derived importance we can see that, for some of the core drivers, Council is already providing 'moderately high' levels of satisfaction, i.e. 'maintenance of local parks, playgrounds and sporting fields' and 'availability of sporting ovals, grounds and facilities'. Council should look to maintain/consolidate their delivery in these areas.

It is also apparent that there is room to elevate satisfaction within the variables that fall in the 'lower' and 'moderate satisfaction' regions of the chart. If Inner West Council can address these core drivers, they will be able to improve resident satisfaction with their performance.

Mapping Stated Satisfaction and Derived Importance Identifies the Community Priority Areas

This analysis indicates that areas such as 'appearance of your local area', 'protecting the natural environment', 'promoting pride in the community', 'Council's childcare service and programs', 'environmental education programs and initiatives', 'traffic management and road safety' and 'provision of council information to the community' could be reviewed for optimisation.

Furthermore, areas such as 'long term planning for the council area', 'managing development in the area', and the 'community's ability to influence Council's decision making' are issues Council should be looking to understand resident expectations and/or more actively inform/engage residents of Council's position and advocacy across these areas.

Key Findings

Advanced Shapley Outcomes

The chart below illustrates the positive/negative contribution the key drivers provide towards overall satisfaction. Some drivers can contribute both negatively and positively depending on the overall opinion of the residents.

The scores on the negative indicate the contribution the driver makes to impeding transition towards satisfaction. If we can address these areas we will see a lift in our future overall satisfaction results, as we will positively transition residents who are currently 'not at all satisfied' towards being 'satisfied' with Council's overall performance.

The scores on the positive indicate the contribution the driver makes towards optimising satisfaction. If we can address these areas we will see a lift in our future overall satisfaction results, as we will positively transition residents who are currently already 'somewhat satisfied', towards being more satisfied with Council's overall performance.

Key Contributors to Barriers/Optimisers

Different levers address the different levels of satisfaction across the community

Summary and Recommendations

Summary and Recommendations

Summary

85% of residents in the new Inner West Council were at least 'somewhat satisfied' with Council performance. The rating achieved is in line with the NSW benchmark for metropolitan councils, but down on comparative scores achieved by the previous Marrickville Entity.

The main drivers of satisfaction are related to engagement with the community, influence on Council's decision making, and also the provision of information to the community. This indicates an interest by the residents to be involved in what is happening in their area. It is very likely that the proclaimed merger has been a key contributor to resident perceptions.

The following measures could be used as KPIs for the follow up survey in 2017.

- 71% of residents rated the availability and accessibility of council services as good to excellent
- 70% residents were somewhat to very satisfied with Council's integrity and decision making
- 58% of residents rated Council's community engagement as good to excellent

The vast majority of residents (96%) agreed that the Inner West area is a good place to live'. Into the future, the areas of highest concern revolved around the sustainability of local development, with its flow-on effects of traffic congestion, population growth, public transport, parking, green spaces, environmental concerns and infrastructure.

This is further substantiated with green spaces, traffic, and development management in the top 6 drivers of overall satisfaction.

97% of residents were aware of the WestConnex project and the majority (57%) were not supportive of it.

Recommendations

- As Inner West Council is still a very new Local Government Area, the overall satisfaction ratings and opinions of residents on services, facilities and challenges in the area represent important baseline measures. Council should use these results to develop delivery plans for the area and then conduct a follow up survey in 12 months to see how residents respond to changes that take place in the first year of the new entity
- Council should look to engage with the community about the future of this new LGA. There also needs to be an exploration of community expectations around the availability and accessibility of Council services, engagement and involvement in decision making
- Council needs to determine how they will address the community's concerns regarding the sustainability of the current infrastructure and services being insufficient to handle a growing population

Section A – Satisfaction with Council

Overall Satisfaction with Council's Performance

Summary

Overall satisfaction was moderate, with 85% stating they were at least 'somewhat satisfied' with Council's overall performance. The rating achieved is similar to the NSW branding benchmark for metropolitan councils.

Females indicated they were significantly more satisfied with Council's performance, as did non-ratepayers.

Q4a. Overall, how satisfied are you with the performance of Inner West Council, not just on one or two issues but across all responsibility areas?

	Overall	Male	Female	18 – 24	25 – 34	35 – 49	50 – 64	65+
Mean ratings	3.42	3.32	3.50▲	3.51	3.60	3.32	3.32	3.37

	Ashfield Ward	Leichhardt Ward	Balmain Ward	Stanmore Ward	Marrickville Ward	Ratepayer	Non-Ratepayer

Availability and Accessibility of Council Services

Summary

71% of residents rated the availability and accessibility of council services highly, claiming the services were 'good' to 'excellent'.

Those living in the Marrickville Ward were significantly more likely to rate them higher.

Q4b. How would you describe the availability and accessibility of Council services?

	Overall	Male	Female	18 – 24	25 – 34	35 – 49	50 – 64	65+
Mean ratings	3.96	3.89	4.02	4.03	3.94	3.85	4.04	4.05

	Ashfield Ward	Leichhardt Ward	Balmain Ward	Stanmore Ward	Marrickville Ward	Ratepayer	Non-Ratepayer
Mean ratings	3.86	3.99	3.91	3.82	4.16▲	3.92	4.06

Scale: 1 = very poor, 6 = excellent

▲ ▼ = significantly higher/lower rating

Base: N=985

Note: 23 residents (2%) responded 'don't know' to this question.

Council's Community Engagement

Summary

58% of residents rated Council's community engagement as good to excellent.

Those living in the Marrickville Ward rated Council's engagement significantly higher.

Q4c. How would you describe Council's community engagement?

	Overall	Male	Female	18 – 24	25 – 34	35 – 49	50 – 64	65+
Mean ratings	3.52	3.46	3.59	3.51	3.60	3.43	3.50	3.63

Scale: 1 = very poor, 6 = excellent

▲ ▼ = significantly higher/lower rating

Note: 8 residents (1%) responded 'don't know' to this question.

Council's Integrity and Decision Making

Summary

70% of residents are 'somewhat satisfied' to 'satisfied' with Council's integrity and decision making. There is room for the new council to improve this score.

Residents aged 35-49 and 50-64 were significantly less likely to be satisfied.

Q5. How satisfied are you with Council's integrity and decision making?

	Overall	Male	Female	18 – 24	25 – 34	35 – 49	50 – 64	65+
Mean ratings	2.96	2.93	2.99	3.04	3.17	2.81 ▼	2.82 ▼	3.07

Scale: 1 = not at all satisfied, 5 = very satisfied

▲ ▼ = significantly higher/lower rating

Note: 1 resident (<1%) responded 'don't know' to this question.

Section B – Contact with Council

Contact with Council

Summary

Just over a third of the residents (37%) stated they had contacted the new Council, the majority by 'telephone'. A large proportion of residents are using modern technology to contact Council, with 23% using 'email' and a further 18% 'via the website'.

Q2a. In May this year the new Inner West Council was formed following a merger of the former Ashfield, Leichhardt and Marrickville Councils – you are a resident of the new Inner West Council. Have you contacted Inner West Council for any reason apart from paying rates?

Base: N=1,008

Q2b. What method did you use to contact Council?

Base: N=369

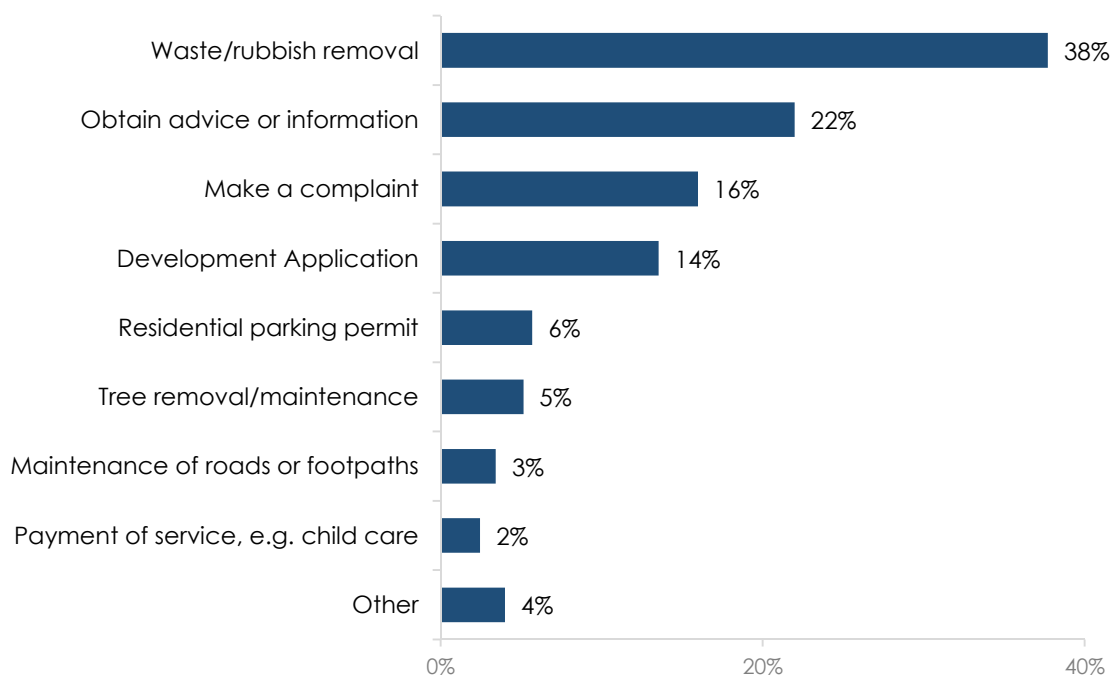

Other specified	
Meeting	3
Facebook	1

Contact with Council

Summary

The predominant reason for contacting Council concerned 'waste/rubbish removal', however, 22% wanted advice or information and 16% to make a complaint.

Q2c. What was the nature of your enquiry?

Base: N=369

Other specified	Count
Report graffiti	3

Contact with Council

Summary

80% of residents stated they were at least 'somewhat satisfied' with the way their contact was handled.

Those who contacted Council 'via the website' were significantly more satisfied with the handling of their contact, whilst those who used 'email' were significantly less satisfied.

Females were significantly more satisfied with their contact.

Q2d. Overall, how satisfied were you with the way your contact was handled?

	Overall	Male	Female	18 – 24	25 – 34	35 – 49	50 – 64	65+
Mean ratings	3.71	3.48	3.90▲	4.33	3.69	3.78	3.61	3.60

Due to the small sample sizes for letter in the post (7) and Council's App (9), means have not been calculated.

Base: N=369

Receiving Information about Council

Summary

Residents receive information about Council from a variety of methods, predominantly from 'brochures/flyers'.

Females were significantly more likely to receive information from brochures/flyers.

Those aged 18-34 were significantly more likely to receive information from 'word of mouth' and social media, with those aged 25-34 also significantly more likely to use social media as a source, but significantly less likely to receive information by 'email'. Residents aged 18-24 & 25-34 were significantly less likely to see information in 'brochures/flyers' or the Inner West News.

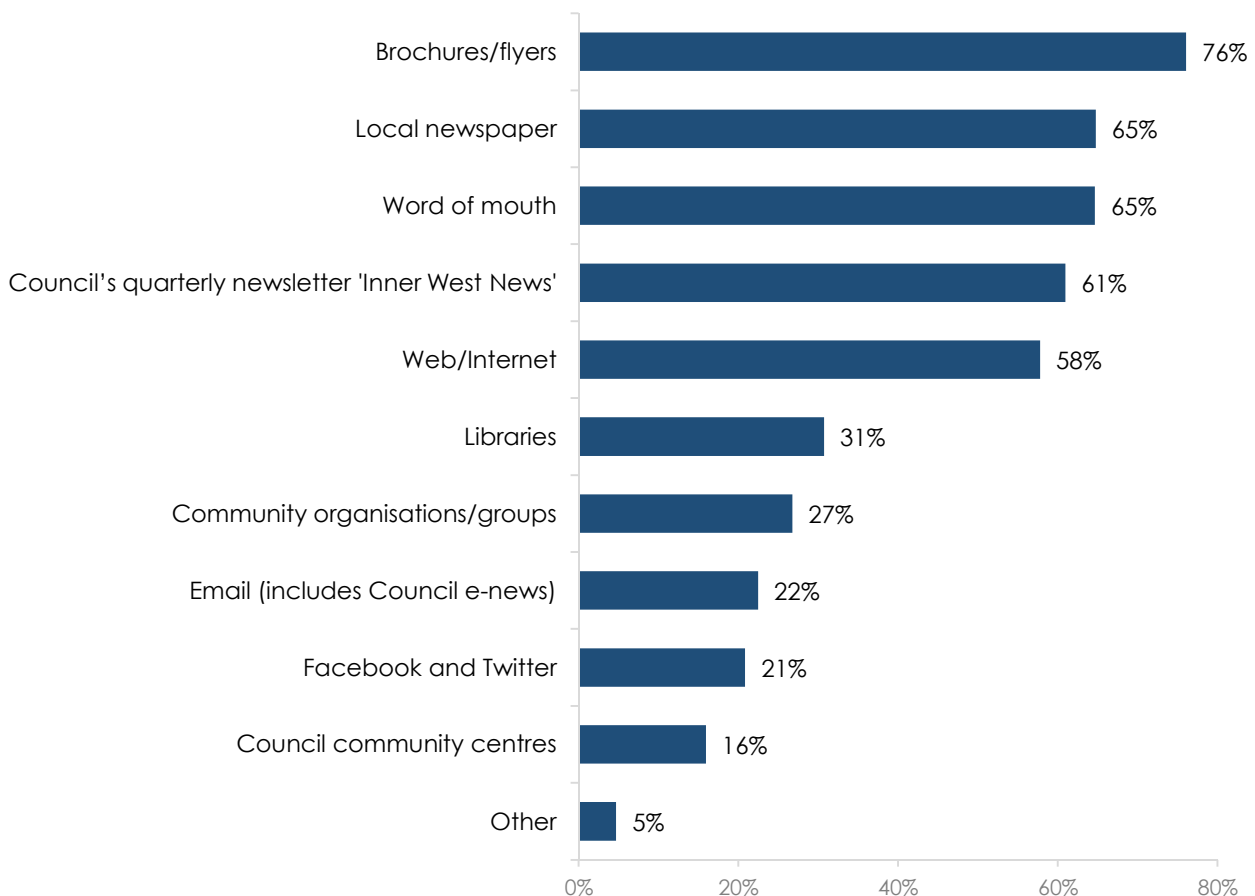

35-49 year olds were significantly more likely to receive information by 'email' or from 'brochures/flyers'.

Those aged 50-64 and 65+ were significantly more likely to receive information from the 'local newspaper', 'brochures/flyers' or the Inner West News, but significantly less likely from 'word of mouth' and social media. Residents aged 65+ were also significantly more likely to receive information from 'libraries', but significantly less likely from the 'web/Internet'.

Marrickville Ward residents were significantly more likely to receive information from 'council community centres', 'community organisations/groups' and social media, however, Ashfield Ward residents were significantly less likely to gather information from the latter.

Balmain Ward residents were significantly more likely to receive information via 'email', but significantly less from the Inner West News. Residents in Leichhardt Ward were significantly less likely to gather information from the 'web/Internet'.

Q6. Through which of the following means do you receive information about Council?

Section C – Living in the Inner West

Living in the Inner West

Summary

96% of residents 'agree' (24%) or 'strongly agree' (72%) that 'the Inner West area is a good place to live'. This is an extremely good result and is substantiated by the subsequently high scoring 'Inner West is a harmonious, respectful and inclusive community' (80% agree – strongly agree), and 'I feel a part of my local community' (76% agree – strongly agree).

The major concern for residents is that 'housing in the area is affordable', with 78% disagreeing with this statement. Also of concern is the result for engagement with the community, with a third of residents disagreeing with the statement 'I have enough opportunities to participate in Council's community consultation'.

Q8a. How strongly do you agree or disagree with the following statements?

Note: The 'neither agree nor disagree' scores have been removed to demonstrate the impact of those who 'agree' and those who 'disagree' with these statements.

Living in the Inner West

Summary

Residents aged 18-34 were significantly more likely to believe 'Council offers good value for money', whilst 25-34 year olds were significantly more likely to agree that 'local town centres are vibrant and economically healthy'.

35-49 year olds were significantly less likely to agree that 'I have enough opportunities to participate in arts and cultural activities', 'local town centres are vibrant and economically healthy', 'Council manages its finances well' and 'Council offers good value for money'.

Residents aged 65+ were significantly more likely to agree that 'housing in the area is affordable', 'I have enough opportunities to participate in arts and cultural activities' and 'I have enough opportunities to participate in Council's community consultation', but less likely to agree that the 'Inner West is a harmonious, respectful and inclusive community'.

Those living in the Ashfield Ward were significantly less likely to agree that 'I have enough opportunities to participate in arts and cultural activities', whilst those in the Balmain Ward were significantly less likely to agree that 'Council offers good value for money'.

Stanmore Ward residents were significantly more likely to agree that 'local town centres are vibrant and economically healthy', 'Council manages its finances well' and 'Council offers good value for money'.

Residents of the Marrickville Ward were significantly more likely to agree that 'Council offers good value for money'.

Ratepayers were significantly more likely to agree that 'I have enough opportunities to participate in sporting or recreational activities' whilst non-ratepayers were significantly more likely to agree that 'local town centres are vibrant and economically healthy' and 'Council manages its finances well'.

Feeling Safe in the LGA

Summary

Whilst residents acknowledge feeling safe in their local area during the day, there is an element who feels quite differently regarding the same situation after dark.

Females are significantly less likely to feel safe in their area after dark (70%).

Marrickville Ward residents are significantly less likely to feel safe alone during the day (97%), whilst those living in the Balmain Ward are significantly more likely to feel safe alone after dark (91%).

Q8b. Do you feel safe in the following situations?

In your local area alone during the day

Base: N=1,008

In your local area alone after dark

Base: N=1,007

Top Priority Areas for Council to Focus On

Summary

Residents are most concerned about the amount of development occurring in the area, and the flow-on effects of traffic congestion, population growth, public transport, parking, green spaces, environmental concerns and infrastructure.

Q7. Thinking of Inner West as a whole, what would you say are the top 3 challenges facing the area in the next 10 years?

Word Frequency Tagging

Verbatim responses for this question were collated and entered into analytical software. This analysis 'counts' the number of times a particular word or phrase appears and, based on the frequency of that word or phrase, a font size is generated. The larger the font, the more frequently the word or sentiment is mentioned.

Base: N = 1,008

State Government Projects and Initiatives

Summary

Although 97% of residents were aware of the **'WestConnex'** project, the majority (57%) were not supportive of it.

Those aged 50-64, and ratepayers were significantly more aware of this project, with males significantly more likely to support it, but Stanmore Ward residents significantly less likely to do so.

The **'renewal of Parramatta Rd'** was known to two-thirds of the community, with the majority in support of the project (83% at least somewhat supportive).

Those aged 25-34 were significantly less aware of this project, whilst those aged 50-64 and 65+, and ratepayers were significantly more aware. Males were significantly more supportive of this venture.

Whilst less than half of the community was aware of the **'development of the Bays Precinct'**, there was a great deal of support for its undertaking (84% at least somewhat supportive).

Males were significantly more aware of this project as were those aged 35-49, 50-64 and 65+, those living in Balmain Ward, and ratepayers. Residents aged 25-34, and those living in the Ashfield and Marrickville Wards were significantly less aware. Those living in Leichhardt Ward were significantly more supportive.

The **'development of the Sydenham to Bankstown corridor'** was the least recognised of the projects, however, the majority of residents chose to support it.

Residents aged 50-64 and 65+, those living in the Marrickville Ward, and ratepayers, were significantly more aware. Those aged 25-34, and those living in Leichhardt and Balmain Wards were significantly less aware. Those living in Stanmore Ward were significantly more supportive.

Q9a. Which of these State Government projects and initiatives taking place in the local area were you aware of prior to this call?

Q9b. What is your level of support for these projects?

Scale: 1 = not at all supportive, 5 = very supportive

Summary – Awareness of and Support for the WestConnex Project

The main reason for supporting WestConnex was 'better traffic flow', whereas those who did not support the project gave their main reasons as 'the project was poorly planned' and 'should have spent the money on public transport'.

Q9d. You mentioned you were supportive of the WestConnex project, may I ask why?

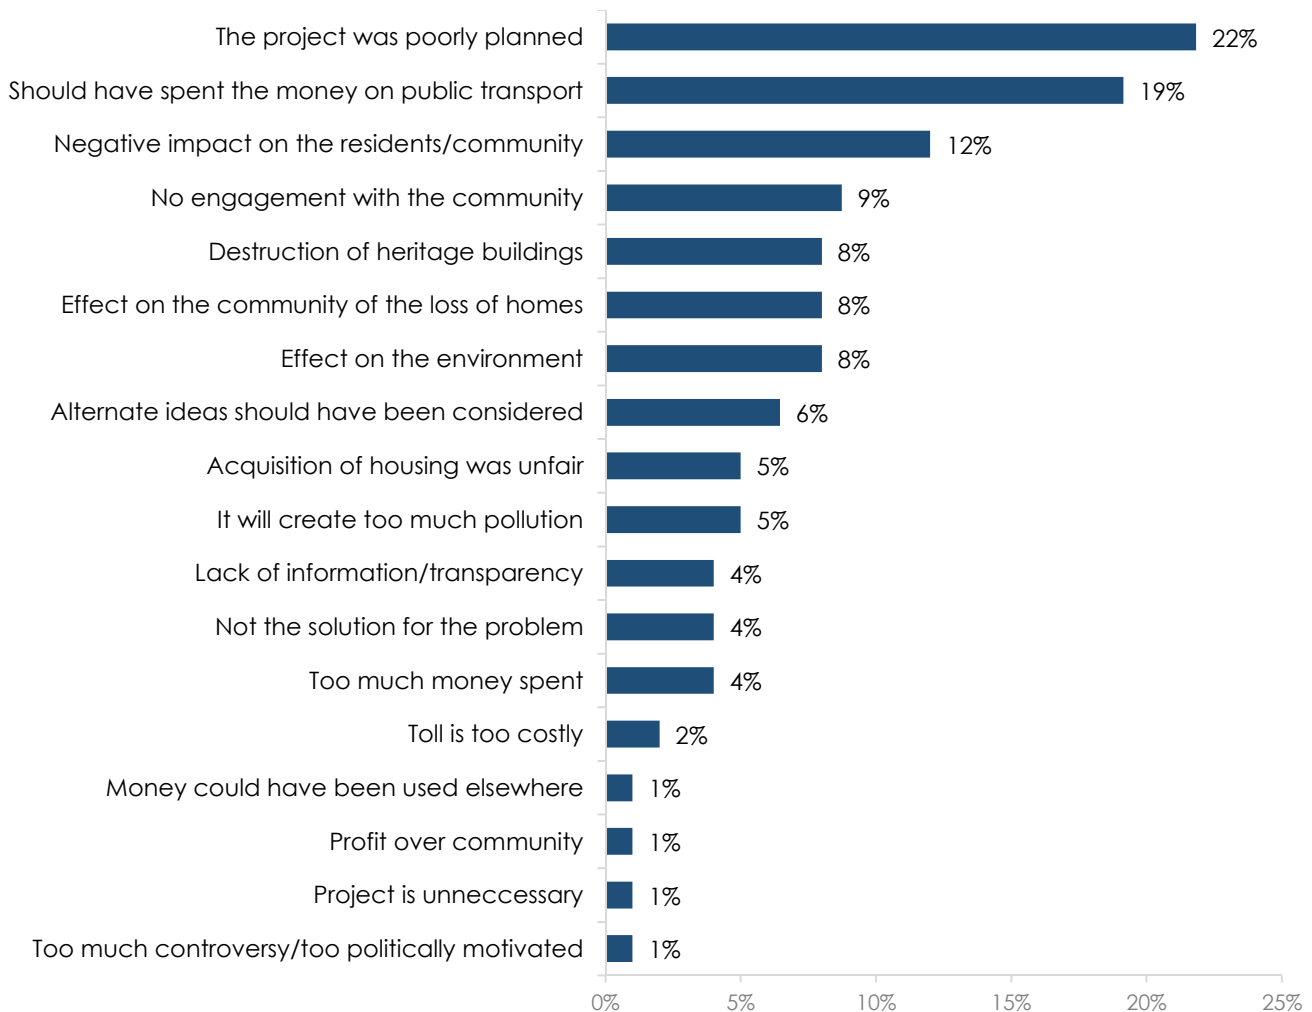

Verbatim responses in support of WestConnex

- "Anything that will improve traffic flow is good"
- "Can get some traffic away from Parramatta Road reducing congestion"
- "For future generations would be good for traffic management"
- "Make it easier to manage to traffic going towards the CBD"
- "Makes transport easier throughout the region"
- "Project will keep traffic off local roads"
- "Traffic congestion will be eased across Sydney metropolitan area"
- "Will take a lot of traffic off Parramatta Rd and local roads"

Support for the WestConnex Project

Q9c. You mentioned you were not supportive of the WestConnex project, may I ask why?

Base: N=1,008

Verbatim responses not supporting WestConnex

- "Better to fund trams or other public transport than putting more private cars on the road"
- "Bringing cars into the city instead of developing a public transport solution"
- "Building new roads doesn't reduce traffic congestion"
- "Don't support destruction of heritage homes to make way for development"
- "Emphasis should be on funding public transport, not on bringing more traffic into the city"
- "Encourages people to use cars so will increase congestion rather than reduce it"
- "Funnelling traffic into suburban areas"
- "Increase traffic congestion in the Inner West"
- "Loss of beautiful old houses along the project corridor"
- "Not enough consideration for the residents living in the area"
- "Project will destroy the function and character of the area"
- "Pulling down a lot of old Sydney homes and destroying the character of Sydney"
- "Too much heritage is being destroyed to complete this project"
- "WestConnex is against everything the people in the area believe in"
- "Will take away from the vibrant community that is the Inner West"
- "Will worsen the congestion on the roads"

Detailed Findings – Importance of, and Satisfaction with, Council Services & Facilities

Influence on Overall Satisfaction

A core element of this community survey was the rating of 41 facilities/services in terms of Importance and Satisfaction. This section reports the Shapley Regression analysis undertaken on these measures – and the detailed responses to the measures themselves.

The chart below summarises the influence of the 41 facilities/services on overall satisfaction with Council's performance, based on the Shapley Regression:

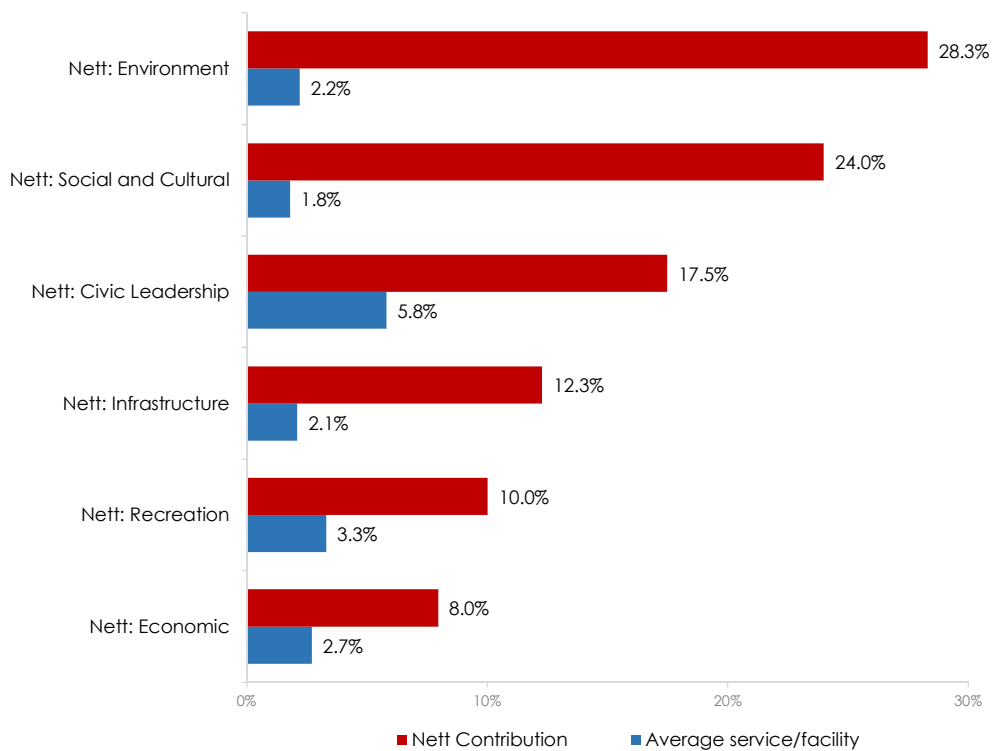

Key Service Areas' Contributions to Overall Satisfaction

By combining the outcomes of the regression data, we can identify the derived importance of the different Nett Priority Areas.

By combining the outcomes of the regression data, we can identify the derived importance of the different Nett Priority Areas.

Contribution to Overall Satisfaction with Council's Performance

'Environment' (28%) is the key contributor toward overall satisfaction with Council's performance, however, each of the services/facilities grouped under this area average 2.2%, whereas the services/facilities in the area of 'Civic Leadership' whose nett is 17.5%, average 5.8%.

Service Areas

Each of the 41 facilities/services were grouped into service areas as detailed below

We Explored Resident Response to 41 Service Areas

Recreation

Availability of sporting ovals, grounds and facilities
Maintenance of local parks, playgrounds and sporting fields
Swimming pools and aquatic centres

Infrastructure

Management of parking
Community centres and facilities
Cycleways
Maintaining footpaths
Maintaining local roads
Traffic management and road safety

Environment

Building heights in town centres
Managing development in the area
Encouraging recycling
Environmental education programs and initiatives
Flood management
Graffiti removal
Household garbage collection
Maintenance and cleaning of town centres
Protecting the natural environment
Protection of low rise residential areas
Removal of illegally dumped rubbish
Stormwater management and flood mitigation
Tree management

Civic Leadership (Including Governance)

Long term planning for council area
Community's ability to influence Council's decision making
Provision of council information to the community

Economic

Access to public transport
Appearance of your local area
Supporting local jobs and businesses

Social and Cultural

Provision of services for older residents
Support for people with a disability
Safe public spaces
Community education programs
Council's childcare service and programs
Festival and events programs
Library services
Programs and support for newly arrived and migrant communities
Promoting pride in the community
Protection of heritage buildings and items
Support and programs for volunteers and community groups
Youth programs and activities
Supporting local artists and creative industries

An Explanation

The following pages detail the Shapley findings for each service area, and summarise the stated importance and satisfaction ratings by key demographics.

Importance

For the stated importance ratings, residents were asked to rate how important each of the criteria was to them, on a scale of 1 to 5.

Satisfaction

Any resident who had rated the importance of a particular criterion a 4 or 5 was then asked how satisfied they were with the performance of Council for that service or facility. There was an option for residents to answer 'don't know' to satisfaction, as they may not have personally used a particular service or facility.

Service Area 1: Recreation

Shapley Regression

Contributes to 10% of Overall Satisfaction with Council

Service Area 1: Recreation

Overview of Importance Rating Scores by Key Demographics

Residents were asked to rate the importance of each criteria.

Importance – overall

Very high	Maintenance of local parks, playgrounds and sporting fields
High	Availability of sporting ovals, grounds and facilities
Moderately high	Swimming pools and aquatic centres

Importance – by gender

Females considered 'maintenance of local parks, playgrounds and sporting fields' and 'swimming pools and aquatic centres' to be of significantly higher importance.

Importance – by age

Residents aged 18-34 rated 'maintenance of local parks, playgrounds and sporting fields' and 'swimming pools and aquatic centres' of significantly lower importance.

Residents aged 35-49 rated 'swimming pools and aquatic centres' significantly higher in importance, whilst those aged 65+ rated the 'availability of sporting ovals, grounds and facilities' of significantly lower importance.

Importance – by ward

Residents of Stanmore Ward rated the 'availability of sporting ovals, grounds and facilities' significantly lower in importance.

Importance – by ratepayer status

Ratepayers rated 'swimming pools and aquatic centres' of significantly higher importance.

Service Area 1: Recreation

Service Area 3: Environment

Overview of Importance Rating Scores by Key Demographics

Residents were asked to rate the importance of each criteria.

Importance – overall

Extremely high	Household garbage collection Protecting the natural environment Encouraging recycling
Very high	Managing development in the area Removal of illegally dumped rubbish Maintenance and cleaning of town centres
High	Tree management Protection of low rise residential areas Environmental education programs and initiatives Stormwater management and flood mitigation
Moderate	Building heights in town centres Flood management Graffiti removal

Importance – by gender

Females rated 8 of the 13 services/facilities higher in importance, including 'building heights in town centres', 'encouraging recycling', 'environmental education programs and initiatives', 'flood management', 'maintenance and cleaning of town centres', 'protecting the natural environment', 'protection of low rise residential areas' and 'tree management'.

Importance – by age

Residents aged 18-24 rated 'environmental education programs and initiatives' and 'protecting the natural environment' significantly higher in importance, but 'building heights in town centres', 'graffiti removal' and 'household garbage collection' significantly lower.

Those aged 25-34 rated 'building heights in town centres', 'graffiti removal', 'protection of low rise residential areas' and 'tree management' significantly lower in importance, whilst those aged 35-49 rated 'encouraging recycling', 'environmental education programs and initiatives' and 'protecting the natural environment' significantly lower.

Importance – by ward

Ashfield Ward residents rated 'building heights in town centres', 'graffiti removal' and 'protection of low rise residential areas' significantly higher in importance, as did those in Leichhardt Ward for 'tree management'. Those living in the Marrickville Ward considered 'flood management' and 'stormwater management and flood mitigation' of significantly higher importance, but 'tree management' significantly lower. Those living in Balmain Ward rated 'flood management' significantly lower.

Importance – by ratepayer status

Ratepayers rated the importance of 'building heights in town centres', 'managing development in the area', 'graffiti removal', 'household garbage collection', 'protection of low rise residential areas' and 'tree management' significantly higher, whilst non ratepayers rated 'environmental education programs and initiatives' significantly higher.

Overview of Importance Rating Scores by Key Demographics

Residents were asked to rate the importance of each criteria.

Importance – overall

Extremely high	Safe public spaces
Very high	Protection of heritage buildings and items Support for people with a disability
High	Provision of services for older residents Library services
Moderately high	Supporting local artists and creative industries Programs and support for newly arrived and migrant communities Support and programs for volunteers and community groups Promoting pride in the community Community education programs Youth programs and activities
Moderate	Festival and events programs Council's childcare service and programs

Importance – by gender

With the exception of 'support for people with a disability', females considered each of these criteria to be of significantly higher importance.

Importance – by age

Residents aged 18-24 considered 'community education programs' significantly more important, and those aged 25-34 considered 'support for people with a disability', 'festival and events programs' and 'programs and support for newly arrived and migrant communities' significantly more important.

Those aged 35-49 considered the importance of 7 of these criteria to be significantly lower, these were:

- Provision of services for older residents
- Support for people with a disability
- Community education programs
- Programs and support for newly arrived and migrant communities
- Promoting pride in the community
- Protection of heritage buildings and items
- Supporting local artists and creative industries

Residents aged 50-64 & 65+ considered 'protection of heritage buildings and items' and 'support for programs for volunteers and community groups' of significantly higher importance, but 'festival and events programs' significantly lower. Additionally, those aged 50-64 rated 'Council's childcare service and programs' of significantly lower importance, and those aged 65+ rated 'provision of services for older residents', 'library services' and 'promoting pride in the community' significantly higher.

Importance – by ward

Residents of the Ashfield Ward deemed 'festival and events programs' and 'supporting local artists and creative industries' significantly lower in importance, and those in the Balmain Ward considered 'community education programs' of significantly lower importance.

Those in the Stanmore Ward rated 'safe public spaces' to be significantly higher in importance, and 'library services' significantly lower.

Marrickville Ward residents considered 'festival and events programs' to be significantly more important.

Service Area 6: Social and Cultural

Overview of Importance Rating Scores by Key Demographics

Residents were asked to rate the importance of each criteria.

Importance – by ratepayer status

Non ratepayers rated 'community education programs', 'festival and events programs', 'programs and support for newly arrived and migrant communities' and 'supporting local artists and creative industries' of significantly higher importance.

Service Area 6: Social and Cultural

Overview of Satisfaction Rating Scores by Key Demographics

Residents were asked to rate their satisfaction with each criteria.

Satisfaction – overall

High	Library services
Moderately high	Festival and events programs Safe public spaces
Moderate	Support and programs for volunteers and community groups Community education programs Promoting pride in the community Council's childcare service and programs Provision of services for older residents Youth programs and activities Support for people with a disability Supporting local artists and creative industries Programs and support for newly arrived and migrant communities Protection of heritage buildings and items

Satisfaction – by gender

There were no significant differences between the genders.

Satisfaction – by age

Those aged 65+ were significantly more satisfied with the 'provision of services for older residents' and 'library services'.

Satisfaction – by ward

Residents of Ashfield Ward were significantly less satisfied with 'safe public spaces' and Stanmore Ward residents were significantly less satisfied with 'library services'.

Balmain Ward residents were significantly less satisfied with 'support for people with a disability', 'Council's childcare service and programs', 'festival and events programs', 'programs and support for newly arrived and migrant communities' and 'supporting local artists and creative industries'.

Those living in the Marrickville Ward were significantly more satisfied with 'Council's childcare service and programs', 'festival and events programs', 'programs and support for newly arrived and migrant communities', 'youth programs and activities' and 'supporting local artists and creative industries'.

Satisfaction – by ratepayer status

There were no significant differences by ratepayer status.

Appendix – Questionnaire

**Inner West Council
Community Survey
October 2016**

Good morning/afternoon/evening, my name is.....from Micromex Research and we are conducting a survey on behalf of Inner West Council on a range of local issues. The survey will take approximately 15 minutes to complete. Would you be able to assist us please?

[If the respondent has difficulty speaking English, ask if there is a family member who can translate. If this is not possible ask the respondent if they would like a translator to call them back to conduct the interview. (Set call back)]
