

Emergency smoke extraction testing - Parramatta Road Ventilation Facility, Haberfield

On Saturday, 15 June and Saturday, 22 June 2019, the Parramatta Road Ventilation Facility will undergo a series of emergency smoke extraction tests to ensure that the facility is working effectively.

The testing is scheduled to occur on 15 and 22 June 2019 and is expected to take place between 6.00 pm and 5.00 am.

The non-toxic mock "smoke" released during these tests will be visible to nearby pedestrians and motorists for a short duration. The emergency services are aware of these tests.

A map showing the testing location is provided overleaf.

What we're doing

The work will involve:

- temporarily turning on the ventilation facility;
- using mock, non-toxic smoke to replicate an emergency extraction; and
- turning the facility off once the test has been completed.

No equipment external to the ventilation facility is required for this testing.

How this affects you

There will be some visible smoke from the Parramatta Road Ventilation Facility. The visible smoke is not hot and will leave no residue in the surrounding area.

If you have an enquiry or complaint about this work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 East team or email
