| The statement of Significance: An interesting pair of occupancies, symmetrical above and asymmetrical below the awning, which, though now seriously compromised, retain their scale and some of their detail and thus have the potential to make a more positive contribution to the streetscape. Recommendations For Conservation Action: (a) Immediate: Adopt an appropriate colour scheme for all painted surfaces and details. Adopt an appropriate signage scheme unifying both frontages. (b) Medium Term: Consider replacing the upper windows with openings more sympathetic in scale, proportion and detailing, and with a suitably designed window awning arrangement. (c) Long Term: Replace shopfront surrounds with more sympathetic materials and colours. | | | | The state of the s | | | | | | | | |
