Revitalising Inner West Main Streets Trial street plazas on London and Simmons Street, Enmore

Dear resident,

Inner West Council will soon temporarily pedestrianise sections of London and Simmons Streets in Enmore, transforming them into vibrant street plazas from December 2025.

This exciting six-month trial is part of Council's Main Street Revitalisation program, which aims to reimagine both London and Simmons Streets and transform them into spaces where the community can sit, chat and enjoy local businesses.

The trial street plazas will include:

- Street furniture, large plantings, and artificial turf on London Street to create a relaxed, green atmosphere.
- An extended outdoor pedestrian and seating area that will be surrounded by pots and plantings adjacent to the Duke of Enmore Hotel in Simmons Street.
- Creation of a southbound one-way cycle lane down Simmons Street.

As part of the trial, London Street will be temporarily closed at Enmore Road. Simmons Street will also operate as a one-way road.

You can find the plans and changes for this trial attached to this letter.

For more information about works times, impacts and the contact details for a responsible Council Officer, please see the reverse side of this letter.

Yours sincerely,

Clr Darcy Byrne
Inner West Mayor

Trial street plazas on London and Simmons Street, Enmore

Work schedule

Works to convert London and Simmons Streets into plazas will commence from Monday 24 November 2025. The works are estimated to take approximately three weeks to complete.

The street plazas will be operational in December 2025.

Reducing community impacts

Temporary road closures will be trialled for a six-month period from the completion of the works in December 2025 to June 2026. Council will be implementing reduced speed limits, improved signage and line marking to support the trial road closures. This includes placing signage in Liberty and London Streets advising motorists of these changes and directing them to take an alternate route.

The trial will enable Council to investigate further traffic calming treatments that might be required within the area.
