These works are part of a \$33m investment that Council has allocated to local roads and regional road, footpaths, traffic facilities, town centres, stormwater, car parks, town centres and cycleway upgrades this financial year.

Due to high day time traffic volumes in this area, Transport for NSW requires that these works are undertaken between 8:00pm and 5:00am.

Please note that the day before the proposed work, traffic controllers will be in contact with local residents and businesses advising them of some changed on street parking conditions to facilitate the works. Traffic controllers will endeavour to retain vehicle access for residents to their property.
