## **ITEM 7**

### **INNER WEST PARKING STRATEGY**

In accordance with an action flagged in Council's Integrated Transport Strategy, Council staff have begun work on a new parking strategy. The parking strategy is intended to be an over-arching policy document that guides the provision and management of parking in both the private and public domains, recognising the interaction between the two areas.

It will integrate all parking policies from the former Councils that make up Inner West Council whilst applying contemporary thinking around ways parking can be provided/managed to maximise access whilst minimising costs, making efficient use of space and promoting sustainability.

Parking management technology will have a significant role to play. Transport Advisory Committee members' thoughts and ideas around parking are sought at this meeting to help guide the strategy.
