IMPORTANT NOTE:
This plan is prepared from a combination of field survey and existing records for the purpose of designing new constructions on the land and should not be used for any other purpose.
The title boundaries shown herein were not marked by the author at the time of survey and have been determined by plan dimensions only and not by field measurement.
Services shown herein have been located where possible by field survey. If no site where possible by field survey, services shown herein are assumed to be in place from the records of previous subdivisions where available, and have been noted accordingly on this plan.
Where such records either do not exist or are considered inadequate, a resolution has been made herein. Prior to any demolition, excavation or construction on the site, the relevant authority should be contacted for possible location of further underground services and detailed locations of all services.
This note is an integral part of this plan.

IMPORTANT NOTE:
This data is prepared from a combination of field survey and existing records for the purpose of designing new constructions on the land and should not be used for any other purpose.
The site boundaries shown herein were not marked by the author at the time of survey and have been determined by plan dimensions only and not by field measurement.
Services shown herein have been located where possible by field survey. If no site where possible by field survey, they are shown as inferred from the records of previous subdivisions where available, and have been noted accordingly on this plan.
Where such records either do not exist or are considered inadequate, a resolution has been made herein.
Prior to any demolition, excavation or construction on the site, the relevant authority should be contacted for possible location of former underground services and detailed locations of all services.
This note is an integral part of this plan.
