

Solar Assessments - Terms and Conditions

1. You have been selected by Inner West Council to receive a free solar advisory assessment as part of Council's Go Solar program. The assessments will be performed by Council's consultant, Energy Action Australia Pty Limited ACN 103 365 199 ("EAA").
2. You will be contacted by EAA to arrange a time to visit you and conduct the assessment. Future correspondence regarding the assessment may be between yourself and EAA.
3. In accepting for EAA to undertake the assessment, you acknowledge that Council has arranged for the assessment but that Council is not performing the assessment. Council makes no warranty as to the suitability or accuracy of the assessment or any advice provided by EAA and Council assumes no responsibility or liability for any matters in relation to the assessment. You release Council from any liability which may arise with respect to the provision of the assessment and the use of any advice or results provided by EAA.
4. At the conclusion of the assessment, EAA will provide you with information regarding solar viability at your premises and depending on the results you may be eligible for a further assessment undertaken by EAA on behalf of Council. In undertaking these assessments, EAA will be relying upon information (including verbal information) provided by you. Unless otherwise expressly advised to you by Council, the scope of EAA's engagement with Council does not extend to independently verifying the accuracy or completeness of that information. EAA is not required to provide you with an editable version of any written information provided.
5. At the conclusion of the assessments outlined above, EAA may give you the option to engage EAA to undertake a structural assessment of your premises and/or provide procurement support. These options are outside the scope of EAA's engagement by Council and are solely at your cost and risk.
6. By accepting for an assessment to be performed, you consent to Council using your business name and information relating to your solar assessment in any promotional material or reports prepared by Council in relation to this project.
7. You agree that by submitting your application for a free solar assessment you confirm that you have no actual or perceived conflict of interest with Council or any of Council's officers or employees and will immediately advise Council if any such conflict of interest arises during the performance of your assessment.
8. Should you have any concerns regarding the assessment or the performance of EAA, please contact Kate Jackson, Coordinator, Community Sustainability on Ph 02 9335 2147 or email kate.jackson@innerwest.nsw.gov.au.
