Any Additional Information?	The Digital Parking Permit System (DPPS) project was initially approved with a budget allocation of up to $300,000 (GST inclusive) to accommodate anticipated implementation complexity, integrations, data migration, training, licensing, contingency, and potential customisation requirements identified during the procurement planning phase. Following detailed technical workshops, internal business analysis, and refinement of the implementation methodology, Council successfully reduced the final project delivery cost while maintaining all core business requirements and integration outcomes. The final commercial arrangement comprises a $49,000 one-off implementation fee, an $18,000 one-off integration cost, and annual subscription fees of $20,000 under a 3+1+1 contract structure. This results in a total potential 5-year project cost of $167,000 (excl. GST), significantly below the original approved budget allocation. The cost reduction was achieved through substantial preparatory work completed internally by Council, streamlined business requirements, reduced customisation, revised integration approaches, staged deployment methodology, and Council-led data preparation and migration activities. The approved budget represented a

	maximum procurement ceiling rather than committed expenditure. The final negotiated outcome demonstrates strong financial management, effective commercial negotiation, and value for money in accordance with Council's Procurement Policy and evaluation principles.
